

Annex 1. Measurement Plots

A1. Measurement result – Plot no.1

A1. Measurement result – Plot no.2

Sub-clause : § 2.1046 , § 24.232 - RF Power Output

Measurement method : Conducted measurement at antenna connector port

Measured channel : UP Link - Mid channel = 1887.5 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.3

Sub-clause : § 2.1046 , § 24.232 - RF Power Output

Measurement method : Conducted measurement at antenna connector port

Measured channel : UP Link - Highest channel = 1913.75 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.4

Sub-clause : § 2.1046 , § 24.232 - RF Power Output

Measurement method : Conducted measurement at antenna connector port

Measured channel : Down Link - Lowest channel = 1931.25 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.5

Sub-clause : § 2.1046 , § 24.232 - RF Power Output

Measurement method : Conducted measurement at antenna connector port

Measured channel : Down Link - Mid channel = 1967.5 MHz

Operating condition : Max. Power output with modulated RF-carrier

 **Agilent**

R T

Channel Power

30.35 dBm /1.2500 MHz

Power Spectral Density

-30.62 dBm/Hz

A1. Measurement result – Plot no.6

Sub-clause : § 2.1046 , § 24.232 - RF Power Output

Measurement method : Conducted measurement at antenna connector port

Measured channel : Down Link - Highest channel = 1993.75 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.7

A1. Measurement result – Plot no.8

A1. Measurement result – Plot no.9

A1. Measurement result – Plot no.10

Sub-clause : § 2.1049 - Occupied Bandwidth

Measurement method : Conducted measurement at antenna connector port

Measured channel : Down Link - Lowest channel = 1931.25 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.11

Sub-clause : § 2.1049 - Occupied Bandwidth

Measurement method : Conducted measurement at antenna connector port

Measured channel : Down Link - Mid channel = 1967.5 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.12

Sub-clause : § 2.1049 - Occupied Bandwidth

Measurement method : Conducted measurement at antenna connector port

Measured channel : Down Link - Highest channel = 1993.75 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.13

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Up Link - Lowest channel = 1851.25 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.14

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Up Link - Lowest channel = 1851.25 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.15

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Up Link - Lowest channel = 1851.25 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.16

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Up Link - Mid channel = 1887.5 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.17

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Up Link - Mid channel = 1887.5 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.18

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Up Link – Mid channel = 1887.5 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.19

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Up Link – Highest channel = 1913.75 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.20

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Up Link – Highest channel = 1913.75 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.21

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Up Link – Highest channel = 1913.75 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.22

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Down Link - Lowest channel = 1931.25 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.23

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Down Link - Lowest channel = 1931.25 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.24

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Down Link - Lowest channel = 1931.25 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.25

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Down Link - Mid channel = 1967.5 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.26

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Down Link - Mid channel = 1967.5 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.27

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Down Link - Mid channel = 1967.5 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.28

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Down Link - Highest channel = 1993.75 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.29

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Down Link - Highest channel = 1993.75 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no.30

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Conducted measurement at antenna connector port

Measured channel : Down Link - Highest channel = 1993.75 MHz

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 31

A1. Measurement result – Plot no. 32

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Input Intermodulation

Measured channel : Up Link – Higher N-2 & N order channel input (N; ch no 1275)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 33

A1. Measurement result – Plot no. 34

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Input Intermodulation

Measured channel : Down Link – Higher N-2 & N order channel input (N: ch no.1275)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 35

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Filter Rejection

Measured channel : UP Link – Lower band (BW: 18.75 MHz)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 36

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal
 Measurement method : Filter Rejection
 Measured channel : UP Link – Higher band (BW= 18.75 MHz)
 Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 37

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Filter Rejection

Measured channel : Down Link – Lower band (BW = 18.75 MHz)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 38

A1. Measurement result – Plot no. 39

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block A: Lower Band edge

Measured channel : Up Link – Lowest channel = 1851.25 MHz (ch : 25)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 40

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block A: Higher Band edge

Measured channel : Up Link – Highest channel = 1864.75 MHz (ch : 275)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 41

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block D : Lower Band edge

Measured channel : Up Link – Lowest channel = 1866.25 MHz (ch 325)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 42

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block D: Higher Band edge

Measured channel : Up Link – Highest channel = 1868.75 MHz (ch 375)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 43

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block B: Lower Band edge

Measured channel : Up Link – Lowest channel = 1871.25 MHz (ch 425)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 44

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block B: Higher Band edge

Measured channel : Up Link – Highest channel = 1883.75 MHz (ch 675)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 45

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block E: Lower Band edge

Measured channel : Up Link – Lowest channel = 1886.25 MHz (ch 725)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 46

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block E: Higher Band edge

Measured channel : Up Link – Highest channel = 1888.75 MHz (ch 775)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 47

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block F:Lower Band edge

Measured channel : Up Link – Lowest channel = 1891.25 MHz (ch 825)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 48

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block F: Higher Band edge

Measured channel : Up Link – Highest channel = 1893.75 MHz (ch 875)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 49

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block C: Lower Band edge

Measured channel : Up Link – Lowest channel = 1896.25 MHz (ch 925)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 50

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block C: Higher Band edge

Measured channel : Up Link – Highest channel = 1908.75 MHz (ch 1175)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 51

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block G: Lower Band edge

Measured channel : Up Link – Lowest channel = 1911.25 MHz (ch 1225)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 52

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block G: Higher Band edge

Measured channel : Up Link – Highest channel = 1913.75 MHz (ch 1275)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 53

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block A: Lower Band edge

Measured channel : Down Link – Lowest channel = 1931.25 MHz (ch 25)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 54

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block A: Higher Band edge

Measured channel : Down Link – Highest channel = 1943.75 MHz (ch 275)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 55

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block D: Lower Band edge

Measured channel : Down Link – Lowest channel = 1946.25 MHz (ch 325)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 56

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block D: Higher Band edge

Measured channel : Down Link – Highest channel = 1948.75 MHz (ch 375)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 57

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block B: Lower Band edge

Measured channel : Down Link – Lowest channel = 1951.25 MHz (ch 425)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 58

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block B: Higher Band edge

Measured channel : Down Link – Highest channel = 1963.75 MHz (ch 675)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 59

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block E: Lower Band edge

Measured channel : Down Link – Lowest channel = 1966.25 MHz (ch 725)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 60

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block E: Higher Band edge

Measured channel : Down Link – Highest channel = 1968.75 MHz (ch 775)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 61

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block F: Lower Band edge

Measured channel : Down Link – Lowest channel = 1971.25 MHz (ch 825)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 62

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block F: Higher Band edge

Measured channel : Down Link – Highest channel = 1973.75 MHz (ch 875)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 63

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block C: Lower Band edge

Measured channel : Down Link – Lowest channel = 1976.25 MHz (ch 925)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 64

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block C: Higher Band edge

Measured channel : Down Link – Highest channel = 1988.75 MHz (ch 1175)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 65

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block G: Lower Band edge

Measured channel : Down Link – Lowest channel = 1991.25 MHz (ch 1225)

Operating condition : Max. Power output with modulated RF-carrier

A1. Measurement result – Plot no. 66

Sub-clause : § 2.1051 , § 24.238 - Spurious Emissions at Antenna terminal

Measurement method : Block G: Higher Band edge

Measured channel : Down Link – Highest channel = 1993.75 MHz (ch 1275)

Operating condition : Max. Power output with modulated RF-carrier
